Common CI tasks when developing C++ based tango projects

- ▶ Building software on various distributions/platforms
- ▶ Using different cppTango versions
- ▶ With different configurations

OCI[1] Images to the resuce

```yaml
variables:
  TANGO_OS_TYPE: "debian12"
  TANGO_VERSION: "HEAD" #  HEAD, 9.5.0 and 9.3.6
  TANGO_WARNINGS_AS_ERRORS: "ON"
  CMAKE_BUILD_TYPE: "Release"

include:
  - project: 'tango-controls/gitlab-ci-templates'
    file: 'cpp.gitlab-ci.yml'
```

Porting TangoTest

```
.gitlab-ci.yml | 123 ++---------------------------
1 file changed, 2 insertions(+), 121 deletions(-)
```

Explicit non-goals

- ▶ Production usage
- ▶ Optimizing image size
- ▶ Versioned images
