

Tango Roadmap

Presenters on behalf of the community:
Thomas Juerges (SKAO)
Thomas Braun (byte physics e.K.)

! Sponsoring = Product owner (PO) !

- LTS releases
 - LTSes overlap for 2 years
 - LTS release supported for ≥ 5 years
- Encryption (**sponsored by DESY**)
 - RFC, tests, implementation
- Alarm & Warning hysteresis (**sponsored by Elettra**)
 - RFC, tests, implementation
- Dynamic attributes on device level (**sponsored by ALBA**)

! PO = Write the RFC, write tests, get it implemented, use it !

- Polling loop improvements (**sponsor needed**)
 - New polling algorithm
 - Data collector
- Finish Open Telemetry Events (**sponsor available?**)
- DevDict (**sponsor needed**)
- Multi-parameter commands (depends on DevDict)
- C++ High level API (**sponsor needed**)
- n-dimensional arrays (**sponsor needed**)
- Maintenance
 - Clean up code
 - Remove notifd
 - Remove pipes (depends on DevDict being available)
 - Locks refactored

Can we improve the roadmap?

Ideas (and sponsoring) for {cpp,Py}Tango
11.0 or later?

JTango is missing from the roadmap! 😞

TJ: Where are our web interfaces?
